Revision date: 6/15/09

Northeastern Illinois Regional Water Supply/Demand Management Plan
Draft Report Outline

Table of Contents
Acknowledgments
Executive Summary

1. Introduction
    a) Background
        i. State Planning
        ii. Regional Planning
    b) The Northeastern Illinois Regional Water Supply Planning Group
    c) Purpose

2. A Framework for Regional Water Supply Planning and Management
    a) Planning Paradigms
        i. Adaptive Management
        ii. Sustainability
    b) Planning and Management in the Region Today
        i. Lake Michigan Service Region
        ii. Groundwater Dependent Users
        iii. Inland Surface Water Dependent Users
        iv. Drought Planning and Management
        v. Great Lakes Compact
        vi. Other Laws: Water Authorities Act
    c) Water Rates in Northeastern Illinois
    d) How Much Water is Currently Used?
        i. Illinois Water Inventory Program
        ii. Regional Water Demand Scenarios for NE IL: 2005-2050
    e) How much water will be needed in the future?
    f) Future water availability
        i. Water Cycle as a Conceptual Model
        ii. Climate Variability and Change
        iii. Surface Water: Variability and Change
        iv. Groundwater: Variability and Change
    g) Water Quality and Aquatic Ecosystems
        i. Water Quality Considerations
        ii. Wetlands / Riparian Areas
        iii. Minimum-Instream Flow

DRAFT

3. Land and Water

~~a) Adequacies, Stresses, Conflicts, and Potential Shortages~~

~~i. Withdrawals from Existing Water Resources~~

~~(1) Lake Michigan~~

~~(2) Groundwater~~

~~Deep-Bedrock Aquifer System~~

~~B. Shallow-Aquifer System~~

~~(3) Inland Surface Waters: Fox and Kankakee Rivers~~

~~b) Programs / Tools for Integration~~

~~i. Groundwater recharge~~

~~ii. Stormwater management~~

~~iii. Wastewater planning~~

~~iv. Regional Comprehensive Planning~~

a) Relationship between Land Use Decisions and Water Resources

b) Programs / Tools for Integration

i. Regional Approach

1) Local Planning Technical Assistance Act

2) Water Revolving Funds

3) Developments of Regional Importance

4) *GO TO 2040*

5) Section 208 Planning

ii. Lake Michigan Service Region Approach

1) Stormwater Retention

2) Expand Permittees within Service Region

iii. Groundwater

1) Water Use Act of 1983

2) Recharge Areas

iv. Inland Rivers

1) Watershed Planning

2) Buffer Protection

v. Other

1) Energy Efficiencies/Water Footprint

2) Targeted Conservation

3) Water Trading

4. Additional Recommendations for Regional Water-Supply Planning

a) Planning Framework

b) ~~Balancing Supply and Demand~~ Managing the Use of Water

i. Water-use Conservation

(1) Residential Surveys

(2) Residential Plumbing Retrofits

(3) System Water Audits, Leak Detection & Repair

(4) Metering with Community Rates for all new connections and Retrofit of existing connections

(5) Large Landscape Conservation Programs & Incentives

(6) High-Efficiency Washing Machine Rebate Program

DRAFT

(7) Public Information
(8) School Education
(9) Conservation Programs for Commercial, Industrial and Institutional Accounts
(10) Wholesale Agency Assistance Programs
(11) Conservation Coordinator
(12) Water Waste Prohibitions
(13) Residential High Efficiency Toilet Replacement Programs
ii. Water-Rate Structures for Full-Cost Pricing
iii. Greywater Reuse
iv. Wastewater Reuse
c) Addressing Water Quality and Aquatic Ecosystem Needs
i. Water Quality
ii. Wetlands / Riparian Area Protection
iii. Instream-flow Protection
d) Drought preparedness
e) Funding Regional Water Supply Planning / Plan Implementation
f) Monitoring and Reassessment
i. Filling Data Gaps
ii. Improving Analytical Tools and Analyses
g) Next planning cycle
i. Sustainability
ii. Integrated Water Resource Planning
iii.Other issues/users to be addressed

5. Water Governance for the 21st Century
a) State
b) Region
c) County

Appendix A – Statements of dissenting views on planning decisions or adopted recommendations

List of Abbreviations and Acronyms
