Revision date: 4/21/09

Northeastern Illinois Regional Water Supply/Demand Management Plan
Draft Report Outline

Table of Contents
Acknowledgments
Executive Summary

1. Introduction
    a) Background
        i. State Planning
        ii. Regional Planning
    b) The Northeastern Illinois Regional Water Supply Planning Group
    c) Purpose

2. A Framework for Regional Water Supply Planning and Management
    a) Planning Paradigms
        i. Adaptive Management
        ii. Sustainability
    ~~a~~b) Planning and Management in the Region Today
        i. Lake Michigan Service Region
        ii. Groundwater Dependent Users
        iii. Inland Surface Water Dependent Users
        iv. Drought Planning and Management
        v. Great Lakes Compact
        vi. Other Laws: Water Authorities Act
    ~~b~~c) Water Rates in Northeastern Illinois
    ~~c~~d) How Much Water is Currently Used?
        i. Illinois Water Inventory Program
        ii. Regional Water Demand Scenarios for NE IL: 2005-2050
    ~~d~~e) How much water will be needed in the future?
    ~~e~~f) ~~How much~~ Future water ~~will be~~ availability ~~e in the future?~~
        i. Water Cycle and Water Budgets
        ii. Climate Variability and Change
        iii. Surface Water: Variability and Change
        iv. Groundwater: Variability and Change[1]
            A.) Deep Bedrock Aquifer System
            B.) Shallow Aquifer System
        ~~v. Land-Use / Change and Relationship to Water Use~~
        ~~vi. Other Uncertainties~~
    ~~f) Supplying Water to Meet Future Needs~~
        ~~i. Adaptive Management~~
        ~~ii. Adequacies, Stresses, Conflicts and Potential Shortages~~[2]
        ~~iii. Sustainable and Reasonable Use~~
        ~~iv. Water Quality Considerations~~

DRAFT

g) Water Quality and Aquatic Ecosystems ~~needs~~

i. Water Quality Considerations

ii. Wetlands / Riparian Areas ~~Protection~~

iii. Minimum-Instream Flow

3. Recommendations for Regional Water-Supply Planning

a) ~~Water-Supply~~ Planning Framework~~and Management in the Context of Integrated Water Resource Management~~

b) Balancing Supply and Demand

i. Water-use Conservation

(1) Residential Surveys

(2) Residential Plumbing Retrofits

(3) System Water Audits, Leak Detection & Repair

(4) Metering with Community Rates for all new connections and Retrofit of existing connections

(5) Large Landscape Conservation Programs & Incentives

(6) High-Efficiency Washing Machine Rebate Program

(7) Public Information

(8) School Education

(9) Conservation Programs for Commercial, Industrial and Institutional Accounts

(10) Wholesale Agency Assistance Programs

~~(11) Conservation Pricing~~

(~~12~~11) Conservation Coordinator

(~~13~~12) Water Waste Prohibitions

(~~14~~13) Residential High Efficiency Toilet Replacement Programs

ii. Water-Rate Structures ~~Including Conservation~~ for Full-Cost Pricing

iii. Greywater Reuse

iv. Wastewater Reuse

~~v. Conjunctive Use~~

~~City of Chicago~~

~~e) Developing New Water Sources~~

~~f~~c) Addressing Water Quality and Aquatic Ecosystem Needs

i. Water Quality

ii. Wetlands / Riparian Area Protection

iii. Instream-flow Protection

~~g~~d) Drought preparedness ~~and Climate Variability / Change~~

~~h) Water quality considerations~~

~~i. Contamination threats to groundwater (e.g. chlorides)~~

~~ii. Contamination threats to surface water supplies~~

~~i~~e) Funding Assistance

~~j~~f) Monitoring and Reassessment

i. Filling Data Gaps

ii. Improving Analytical Tools and Analyses

DRAFT

~~k~~g) Next planning cycle

i. Sustainability

ii. Integrated Water Resource Planning

iii. Other issues/users to be addressed ~~(e.g. recreation)~~

4. Land-use / change and Relationship to Water use

a) Adequacies, Stresses, Conflicts, and Potential Shortages

i. Withdrawals from Existing Water Resources

(1) Lake Michigan

(2) Groundwater

A. Deep-Bedrock Aquifer System

B. Shallow-Aquifer System

(3) Inland Surface Waters: Fox and Kankakee Rivers

b) Programs / Tools for Integration

i. Groundwater recharge

ii. Stormwater management

iii. Wastewater planning

iv. Regional Comprehensive Planing~~: *Go to 2040*~~

~~4~~5. Water Governance for the 21st Century

a) State

b) Region

c) County

Appendix A – Statements of dissenting views on planning decisions or adopted recommendations

Glossary

NOTES:

1. The reader is referred to the ISWS report for detailed discussion of these topics.
