Revision date: 7/20/09

Northeastern Illinois Regional Water Supply/Demand Management Plan
Draft Report Outline

Table of Contents
Acknowledgments
Executive Summary

1. Introduction
    a) Background
        i. State Planning
        ii. Regional Planning
    b) The Northeastern Illinois Regional Water Supply Planning Group
    c) Purpose

2. A Framework for Regional Water Supply Planning and Management
    a) Planning Paradigms
        i. Adaptive Management
        ii. Sustainability
    b) Planning and Management in the Region Today
        i. Lake Michigan Service Region
        ii. Groundwater Dependent Users
        iii. Inland Surface Water Dependent Users
        iv. Drought Planning and Management
        v. Great Lakes Compact
        vi. Other Laws: Water Authorities Act
    c) Water Rates in Northeastern Illinois
    d) How Much Water is Currently Used?
        i. Illinois Water Inventory Program
        ii. Regional Water Demand Scenarios for NE IL: 2005-2050
    e) How much water will be needed in the future?
    f) Future water availability
        i. ~~Water Cycle- as a Conceptual Model~~
        ii. Climate Variability and Change
        iii. Surface Water: Variability and Change
        iv. Summary of Regional Groundwater Modeling Study~~:~~ ~~Variability and Change~~
    g) Water Quality and Aquatic Ecosystems
        i. Water Quality Considerations
        ii. Wetlands / Riparian Areas
        iii. Minimum-Instream Flow

DRAFT

3. Land and Water

a) Relationship between Land Use Decisions and Water Resources

b) The Role of Water Resources in Land-Use Decisions

c) Towards Integration

~~b~~d) Programs / Tools for Integration

i. Regional Approach

1) Local Planning Technical Assistance Act
2) Water Revolving Funds
3) Developments of Regional Importance
4) *GO TO 2040*
5) Section 208 Planning

ii. Lake Michigan Service Region Approach

1) Stormwater Retention
2) Add New Lake Michigan ~~Expand~~ Permittees within the Service Region
~~2)~~3) Proactive IDNR/OWR/LMMS Conservation Efforts

iii. Groundwater-Dependent Subregion

1) Water Use Act of 1983
2) Recharge Areas

iv. Inland Rivers

1) Watershed Planning
2) ~~Buffer Protection~~

v. ~~Other~~ Innovations

1) ~~Energy Efficiencies/Water Footprint~~
2) Targeted Conservation
~~2)~~3) Water Footprint
~~3)~~4) ~~Water Trading~~

4. Additional Recommendations for Regional Water-Supply Planning

a) Planning Framework

b) Managing the Use of Water

i. Water-use Conservation

1) Conservation Financing
2) Conservation Coordinator
3) Water Survey Program for Single-Family and Multifamily Residential Customers
4) Residential Plumbing Retrofit
5) System Water Audits, Leak Detection & Repair
6) Metering with Community Rates for all new connections and Retrofit of existing connections
7) Residential High Efficiency Toilet Replacement Programs
8) High-Efficiency Washing Machine Rebate Program
9) Water Waste Prohibitions
10) Large Landscape Conservation Programs & Incentives

DRAFT

11) Conservation Programs for Commercial, Industrial and Institutional Accounts
12) Wholesale Agency Assistance Programs
13) Public Information
14) School Education
15) Potential Water Savings for Conservation Measures
16) Energy and Water
ii. Water-Rate Structures for Full-Cost Pricing
iii. Greywater Reuse
iv. Wastewater Reuse
c) Addressing Water Quality and Aquatic Ecosystem Needs
i. Water Quality
ii. Wetlands / Riparian Area Protection
iii. Instream-flow Protection
d) Drought preparedness
e) Funding Regional Water Supply Planning / Plan Implementation
f) Monitoring and Reassessment
i. Filling Data Gaps
ii. Improving Analytical Tools and Analyses
g) Next planning cycle
i. Sustainability
ii. Integrated Water Resource Planning
iii.Other issues/users to be addressed

5. Water Governance for the 21st Century
a) State
b) Region
c) County

Appendix A – Statements of dissenting views on planning decisions or adopted recommendations

List of Abbreviations and Acronyms
