2.0 CMAQ Programming Approach

The MPO Policy Committee has approved revisions to the programming process for the Congestion Mitigation and Air Quality Improvement (CMAQ) Program. These changes include an enhanced role for the Regional Transportation Operations Coalition (RTOC). This endorses an enhanced role for operations in reducing regional congestion, consistent with the recently adopted GO TO 2040 Comprehensive Regional Plan. CMAP staff will introduce modifications to the CMAQ Program development process to the coalition. The RTOC will begin discussing the goals, objectives and performance measures that will inform RTOC during project identification and prioritization for the CMAQ Project Selection Committee.
