

Revision date: 7/20/09

Northeastern Illinois Regional Water Supply/Demand Management Plan  
*Draft Report Outline*

Table of Contents  
Acknowledgments  
Executive Summary

1. Introduction

- a) Background
  - i. State Planning
  - ii. Regional Planning
- b) The Northeastern Illinois Regional Water Supply Planning Group
- c) Purpose

2. A Framework for Regional Water Supply Planning and Management

- a) Planning Paradigms
  - i. Adaptive Management
  - ii. Sustainability
- b) Planning and Management in the Region Today
  - i. Lake Michigan Service Region
  - ii. Groundwater Dependent Users
  - iii. Inland Surface Water Dependent Users
  - iv. Drought Planning and Management
  - v. Great Lakes Compact
  - vi. Other Laws: Water Authorities Act
- c) Water Rates in Northeastern Illinois
- d) How Much Water is Currently Used?
  - i. Illinois Water Inventory Program
  - ii. Regional Water Demand Scenarios for NE IL: 2005-2050
- e) How much water will be needed in the future?
- f) Future water availability
  - i. ~~Water Cycle as a Conceptual Model~~
  - ii. Climate Variability and Change
  - iii. Surface Water: Variability and Change
  - iv. Summary of Regional Groundwater Modeling Study: Variability and Change
- g) Water Quality and Aquatic Ecosystems
  - i. Water Quality Considerations
  - ii. Wetlands / Riparian Areas
  - iii. Minimum-Instream Flow

### 3. Land and Water

a) Relationship between Land Use Decisions and Water Resources

b) The Role of Water Resources in Land-Use Decisions

c) Towards Integration

bd) Programs / Tools for Integration

- i. Regional Approach
  - 1) Local Planning Technical Assistance Act
  - 2) Water Revolving Funds
  - 3) Developments of Regional Importance
  - 4) *GO TO 2040*
  - 5) Section 208 Planning
- ii. Lake Michigan Service Region Approach
  - 1) Stormwater Retention
  - 2) Add New Lake Michigan ~~Expand~~ Permittees within the Service Region
  - 2)3) Proactive IDNR/OWR/LMMS Conservation Efforts
- iii. Groundwater-Dependent Subregion
  - 1) Water Use Act of 1983
  - 2) Recharge Areas
- iv. Inland Rivers
  - 1) Watershed Planning
  - 2) Buffer Protection
- v. Other Innovations
  - 1) Energy Efficiencies/Water Footprint
  - 2) Targeted Conservation
  - 2)3) Water Footprint
  - 3)4) Water Trading

### 4. Additional Recommendations for Regional Water-Supply Planning

a) Planning Framework

b) Managing the Use of Water

i. Water-use Conservation

1) Conservation Financing

2) Conservation Coordinator

3) Water Survey Program for Single-Family and Multifamily Residential Customers

4) Residential Plumbing Retrofit

5) System Water Audits, Leak Detection & Repair

6) Metering with Community Rates for all new connections and Retrofit of existing connections

7) Residential High Efficiency Toilet Replacement Programs

8) High-Efficiency Washing Machine Rebate Program

9) Water Waste Prohibitions

10) Large Landscape Conservation Programs & Incentives

11) Conservation Programs for Commercial, Industrial and Institutional Accounts

12) Wholesale Agency Assistance Programs

13) Public Information

14) School Education

[15\) Potential Water Savings for Conservation Measures](#)

[16\) Energy and Water](#)

ii. Water-Rate Structures for Full-Cost Pricing

iii. Greywater Reuse

iv. Wastewater Reuse

c) Addressing Water Quality and Aquatic Ecosystem Needs

i. Water Quality

ii. Wetlands / Riparian Area Protection

iii. Instream-flow Protection

d) Drought preparedness

e) Funding Regional Water Supply Planning / Plan Implementation

f) Monitoring and Reassessment

i. Filling Data Gaps

ii. Improving Analytical Tools and Analyses

g) Next planning cycle

i. Sustainability

ii. Integrated Water Resource Planning

iii. Other issues/users to be addressed

5. Water Governance for the 21<sup>st</sup> Century

a) State

b) Region

c) County

Appendix A – Statements of dissenting views on planning decisions or adopted recommendations

List of Abbreviations and Acronyms
