South Suburban Stormwater Management Tools Workshop Agenda

Goal: The South Suburban Stormwater Management Workshop will describe the technical spectrum of engineering and legal solutions for various stormwater processes. Attendees will receive helpful tools and resources for use in their communities. This workshop is targeted toward Village officials to help them respond to various stormwater management problems within and between communities.

Tools: Design resources, sample ordinances and Inter-governmental Agreements, funding opportunities, and GIS resources will all be discussed and distributed.

Date and Time: June 28, 8:30 to 12:00

<u>Agenda</u>

8:30 Introduction

- Outline problems and trends in stormwater management

8:45 MWRDGC: David St. Pierre will discuss MWRD stormwater management strategies and green infrastructure

9:15 Engineering: Spectrum of Problems and Solutions

- Review Case Studies for various problems community administrators face
- Outline spectrum of solutions, from green to grey infrastructure.
- How and when to apply each

9:45 Legal: Problems and Solutions

- When is a problem a legal problem?
    - Public vs. Private
    - Intra- and inter-community issues
- How do ordinances help or hinder solutions?
- What are the tools and resources to manage legal concerns?

10:15 Cook County Forest Preserve District: Kindy Kruller and Eric Otto will discuss CCFPD's master planning and stormwater management strategies.

10:40 SSMMA GIS Atlas: Mike Rizzitiello and Dennis Latto will discuss stormwater management tools as part of the GIS Atlas program.

11:00 Chicago Wilderness Sustainable Watershed Action Team (SWAT): Nancy Williamson will introduce and the resources and concepts it can offer.

11:15 Workshop Stormwater Examples: We will workshop South Suburban specific examples to apply the tools we have learned.

11:45 Review Solutions and Question and Answers
