

Revision date: 09/15/09

Northeastern Illinois Regional Water Supply/Demand Management Plan  
*Draft Report Outline*

Table of Contents  
Acknowledgments  
Executive Summary

1. Introduction
  - a) Background
    - i. State Planning
    - ii. Regional Planning
  - b) The Northeastern Illinois Regional Water Supply Planning Group
  - c) Purpose
  
2. A Framework for Regional Water Supply Planning and Management
  - a) Planning Paradigms
    - i. Adaptive Management
    - ii. Sustainability
  - b) Planning and Management in the Region Today
    - i. Lake Michigan Service Region
    - ii. Groundwater Dependent Users
    - iii. Inland Surface Water Dependent Users
    - iv. Drought Planning and Management
    - v. Great Lakes Compact
    - vi. Other Laws: Water Authorities Act
  - c) Water Rates in Northeastern Illinois
  - d) How Much Water is Currently Used?
    - i. Illinois Water Inventory Program
    - ii. Regional Water Demand Scenarios for NE IL: 2005-2050
  - e) How much water will be needed in the future?
  - f) Future Water Availability
    - i. Climate Variability and Change
    - ii. Surface Water: Variability and Change
    - iii. Summary of Regional Groundwater Modeling Study
  
  - g) Water Quality and Aquatic Ecosystems
    - i. Water Quality Considerations
    - ii. Wetlands / Riparian Areas
    - iii. ~~Minimum~~-Instream Flow Protection

### 3. Land and Water

- a) Relationship between Land Use Decisions and Water Resources
- b) ~~The Role of Water Resources in Land Use Decisions~~ The Impact of Land-Use Decisions on Water Resources
- c) Towards Integration
- d) Programs / Tools for Integration
  - i. Regional Approach
    - 1) Local Planning Technical Assistance Act
    - 2) Water Revolving Funds
    - 3) Developments of Regional Importance
    - 4) *GO TO 2040*
    - 5) Section 208 Planning
    - 6) Recharge Areas
    - 7) Stormwater Retention
  - ii. Lake Michigan Service Region Approach
    - 1) Stormwater Retention
    - 2) Add New Lake Michigan Permittees within the Service Region
    - 3) Proactive IDNR/OWR/LMMS Conservation Efforts
  - iii. Groundwater-Dependent Subregion
    - 1) Water Use Act of 1983
    - 2) ~~Recharge Areas~~ Stormwater Retention
  - iv. Inland Rivers
    - 1) Watershed Planning
    - 2) Stormwater Retention
  - v. Zero Water Footprint Innovations
    - ~~3) Targeted Conservation~~
    - ~~4) Water Footprint~~

### 4. Additional Recommendations for Regional Water-Supply Planning

- a) Planning Framework
- b) Managing the Use of Water
  - i. Water-use Conservation
    - 1) Conservation Financing
    - 2) Conservation Coordinator
    - 3) Water Survey Program for Single-Family and Multifamily Residential Customers
    - 4) Residential Plumbing Retrofit
    - 5) System Water Audits, Leak Detection & Repair
    - 6) Metering with Community Rates for all new connections and Retrofit of existing connections
    - 7) Residential High Efficiency Toilet Replacement Programs

- 8) High-Efficiency Clothes Washing Machine Rebate Program
- 9) Water Waste Prohibitions
- 10) Large Landscape Conservation Programs & Incentives
- 11) Conservation Programs for Commercial, Industrial and Institutional Accounts
- 12) Wholesale Agency Assistance Programs
- 13) Public Information
- 14) School Education
- 15) Potential Water Savings for Conservation Measures
- 16) Energy and Water
- ii. Water-Rate Structures for Full-Cost Pricing
- iii. Greywater Reuse
- iv. Wastewater Reuse
  - 1) Potential Users
  - 2) Demand Estimation
  - 3) Supply
  - 4) Distribution
  - 5) Regulation and Permitting
  - 6) Implementation Scenarios
- c) Addressing Water Quality and Aquatic Ecosystem Needs
  - i. Water Quality Protection
    - 1) Chlorides
    - 2) Nutrients
  - ii. Wetlands / Riparian Area Protection
  - iii. Instream-flow Protection
- d) Drought preparedness
- e) Funding Regional Water Supply Planning / Plan Implementation
- f) Monitoring / Data Collection and Reassessment
  - ~~i. Filling Data Gaps~~
  - ~~ii. Improving Analytical Tools and Analyses~~
- g) Next planning cycle
  - i. Sustainability
  - ii. Integrated Water Resource Planning
  - iii. Other issues/users to be addressed

5. Water Governance A Few Words About Water Management infor the 21<sup>st</sup> Century

- a) State
- b) Region
- c) County

Appendices

Appendix A – Statements of dissenting views on planning decisions or adopted recommendations  
Water Savings Calculations Summaries
