South Suburban College • University & College Center
16333 South Kilborn Ave • Oak Forest, IL 60452

Tuesday, December 14, 2011 • 8:30 a.m. - 3:30 p.m.
State of Illinois Building
160 North LaSalle St • Chicago, IL 60601

Are your energy expenditures continuing to rise year after year…cutting into your bottom line?
Would you like to receive both immediate and sustained energy cost savings?
Are you ready to take control of your energy dollars?
Would you like to fully leverage state and utility energy efficiency incentives?

If your answer to any of these questions is"Yes!", then this hands-on workshop and implementation service is for you!

The Whole Enterprise™ Approach to strategic energy management contributes to these DCEO goals through its proven everydayMBA® Three-Step Program:

Program Objectives and Benefits – everydayMBA® Three-Step Program

STEP 1 - The Sustainable Energy Planning (SEP) Workshop provides powerful new tools to reduce energy consumption, improve energy efficiency, and maximize avoided energy costs. The SEP Workshop engages and empowers your energy team to create a sustainable energy management plan to ensure both immediate and long-term energy usage reductions. Customized, on-site instruction is a program option for organizations that have participated in prior SEP workshops.

STEP 2 - Our staffs of energy experts provide "hands on" consulting and coaching support to implement energy conservation measures; including assistance with incentive applications and project management/facilitation to implement specific energy performance upgrades or retrofits.

STEP 3 - A follow-up session allows participants to share lessons learned, strategies to win incentive dollars, and best industry practices regarding energy conservation.

What will participants receive…

- You will attend a workshop that will help you assess your current energy management program and equip you with the tools needed to create a Sustainable Energy Plan for your company. You will leave with a template and preliminary plan to help you apply the key elements that you have acquired from the workshop.
- Utilivate Technologies will offer, on average, 25 hours of assistance, at no cost to your company, in supporting the creation and implementation of your Sustainable Energy Plan; including, project management/facilitation to implement specific energy upgrades or retrofits.
- Utilivate staff will assist in identifying projects that qualify for the Illinois Energy Efficiency Incentive Program and preparing prescriptive and custom incentive applications for DCEO, ComEd, Ameren Illinois Utilities, Nicor, Peoples Gas, and North Shore Gas programs based on program findings.
- You will participate in a follow-up session to share key successes from your efforts in creating and implementing a sustainable energy plan for your company; and capturing energy efficiency incentives.

Illinois Department of Commerce and Economic Opportunity (DCEO) will underwrite over 90% of total program fees; each organization pays only $500. Three people from your organization can attend for this single organization fee of $500…which allows participation of your whole energy team!

Who should attend?

- Large commercial and industrial businesses and organizations in the public sector
- The VP of Operations, CFO, or a senior manager that will be responsible for supporting the creation and effective implementation of a company-wide energy plan.
- The individual(s) who has the day-to-day responsibility for managing the energy spend for your company. This may be your Plant manager, Energy manager or your Facilities manager.
- Each organization can send up to three individuals to the workshop.

Take control of your energy dollars by participating in this unique DCEO-sponsored energy initiative. This program is open to the **first 26** companies that respond to and qualify for this offer and will fill up quickly.

What participants are saying…

"Best explanation I have seen. Easy to use."…"Great workshop. This will help me do my job better."…"Fantastic session."…"The energy mandate will enable me to write my annual performance appraisal."…"Very informative, long way to go, but I now have a roadmap."…"Well done. I recommend it to all professional energy managers!"…

98% of the attendees surveyed would recommend this workshop to other energy professionals.
