Sportworks history

Over two decades ago Sportworks began designing, manufacturing and distributing thoughtful, well-engineered commercial bike products that promote bicycle use in urban environments.

Today

04

We are the worldwide leader in transit racks for public transportation worldwide, transporting over 1 million bikes and their riders every month.

We are also emerging as one of the fastest growing bike rack manufacturers because of our use of stainless steel, patented designs, and cyclist friendly benefits.

Increased infrastructure

05

Over the past decade we have witnessed a substantial increase in cycling and consequently, cycling infrastructure. This trend is continuing to increase – gaining popularity and leading to an increase awareness and acceptance of cycling as a mode of transportation.

Benefits

Numerous benefits for people who cycle

IMPROVES SOCIAL EQUITY

The fastest growth in bicycling is among the Hispanic, African American and Asian American populations.

PROMOTES HEALTH

Obese across the country and looking for ways to address the growing obesity epidemic.

ENVIRONMENTALLY FRIENDLY

Providing parking not only promotes health and supports the local economy, it also reduces traffic congestion, pollution, noise, air fuel costs, and road maintenance costs.
