Level I amendment applications are the highest level of amendment and are used for those proposals which are areawide in their anticipated impact and/or which have extensive ramifications for the region. A public hearing may be requested for Level I amendments by interested parties. Hearings are announced in area newspapers 45 days in advance and usually include daytime and evening sessions.

Level II amendment applications are for requests that affect only a limited geographic area or which, if areawide, have only limited policy implications. These usually include amendment

requests of plan problem statements, commentary, and /or management agency designations. CMAP staff issues a 30 day public meeting notice for Level II amendment requests.

A draft review, based on CMAP's nine water quality review criteria for Level I and Level II requests is distributed to the applicant and other affected/interested parties prior to the scheduled Wastewater Committee Meeting.
