

# How to Seal the Deal | Development Incentives

## Which programs are the best fit for your community?

CMAP invites you to the second in an ongoing series of panel discussions focusing on best practices in planning and economic development.

Our panel of experts will use case studies to define incentives and formulate when, how and why incentives would be a good match for proposed developments. The event, co-hosted by Commonwealth Edison, will offer municipal managers, economic and community development practitioners an opportunity for a lively discussion and networking.

*Please join us!*
