Jobs Housing Balance Preliminary Findings

Lee A. Deuben

Jobs Housing Balance

Purpose: to obtain a regional overview of the current state of the jobs to housing balance throughout the region, future scenarios and policy implications

- 1. Current Conditions:** Typologies were developed to measure Jobs to Housing in relationship to:
 - Affordable housing & employment subcenters
 - Mean travel time to work & employment subcenters
 - Jobs to Housing Ratio & affordable housing
 - Jobs to Housing Ratio & mean travel time
- 2. Future Scenarios:** 2030 Forecasted jobs to housing growth rate & ratio

Measuring Affordable Housing

- Affordability determined according to IHDA's standard:
 - 80% or less of PMSA median income for owner: \$125,000
 - 60% or less of PMSA median income for rental: \$775 per month
- Total units counted by municipality falling under 60/80% income threshold
- Affordable housing units by municipality determined as a percentage of total housing units

Developing Typologies

Jobs to Housing Ratio

- **Housing Rich:** Low Jobs: High Housing = $J:H < 1.0$
(Less than 1 job to every 1 household)
- **Balanced:** Mid Jobs: Mid Housing = $J:H 1.01-1.6$
(Between 1.0 and 1.6 jobs to every 1 household)
- **Jobs Rich:** High Jobs: Low Housing = $J:H > 1.61$
(More than 1.6 jobs to every 1 household)

Regional Jobs to Housing Ratio= 1.3

What's Next?

- LEHD data- where are low-income families traveling to for work?
- Determine policy implications for jobs to housing mismatch
 - Economic development near affordable housing clusters
 - Affordable housing policy near job subcenters
 - Implication on transportation investments
- Research household expenditures & implications of spatial mismatch of jobs to housing
