

Northeastern Illinois Local Roads Five Percent Locations

This map was produced by The Chicago Metropolitan Agency for Planning based on information provided by the Illinois Department of Transportation Bureau of Safety Engineering. The data represents an IDOT analysis of crashes that occurred between 2007 and 2011 on the local roads. All Tier and Criteria levels have been aggregated and included. The map is only intended to be used to determine if a proposed CMAQ project includes a road segment or intersection that has been identified as a Five-Percent location. Produced 12/02/2014.
