

# Regional Map of Metropolitan Chicago

To integrate planning for transportation and land use, the Chicago Metropolitan Agency for Planning (CMAP) has been created by merging the staffs of the Chicago Area Transportation Study (CATS) and the Northeastern Illinois Planning Commission (NIPCC). CMAP serves the counties of Cook, DuPage, Kane, Kendall, Lake, McHenry, & Will.

Most features depicted in this map reflect their status as of 2005, unless otherwise indicated. Because the base data came from a variety of federal, state, and local government agencies, the depiction of precise boundary features may vary somewhat across the region.

CMAP is grateful to the following agencies that assisted by contributing GIS data and/or reviewing proof of the map:
