## MEMORANDUM

**To:** CMAP Coordinating Committee

**From:** CMAP Staff

**Date:** January 2, 2020

**Re:** CMAP Local Technical Assistance (LTA) Program and Joint  
Call for Projects Update

---

---

In conjunction with the RTA's Community Planning program, CMAP held a call for new LTA program project applications in fall 2019. Applications were due on October 18, 2019, and CMAP and the RTA received a combined 82 applications from 71 different applicants.

Local Planning staff evaluated the applications and solicited input from Policy and Programing staff, as well as the working committees, and external partners including RTA and the transit service boards, CDOT, Chicago DPD, County Development Directors, Planning Liaisons, and partner technical assistance providers. Staff considered several factors when evaluating each application: alignment with ON TO 2050, community need, geographic resource distribution, topic diversity, alignment with agency priorities, implementation potential, and available resources.

This is NOT the final project list, but a list of projects with highest potential to be included in the FY21 LTA Project Group are being presented to the Coordinating Committee for a second round of discussion and feedback. The Project Group will next be presented to the Environmental and Natural Resources, Economic Development, Transportation, Human and Community Development, and Land Use and Housing Committees for feedback. The final Staff recommendations will then be presented to the Coordinating Committee, MPO Policy Committee and CMAP Board discussion, approval, and authorization for Staff to develop a budget and scope of work for each project to be included in the FY2021 CMAP budget.

## Attachment B: Summary of Local Technical Assistance and Community Planning Applications October 29, 2019

### Background

CMAP established the **Local Technical Assistance** program to direct resources to communities to pursue planning work that helps to implement GO TO 2040 and now **ON TO 2050**. In conjunction with the RTA's Community Planning program, the agencies opened a call for projects on September 17, 2019. This year, applicants were able to apply to both programs through a single online application. This agency coordination allows both agencies to offer planning and plan implementation assistance to an expanded base of eligible applicants, and align all efforts with CMAP's **ON TO 2050** priorities, and/or **Invest in Transit**, the 2018-2023 Regional Transit Strategic Plan, and provide technical assistance in a coordinated manner to the entire region. Applications were due on October 18, 2019 and as a result of the call for Projects 81 applications were received from 70 different applicants.

### Call for Projects timeline

September 17, 2019	Call for Projects opened
September 19, 2019	Application information webinar
October 18, 2019	Call for Projects closed
October 2019	CMAP creates study area maps for each application
October – December 2019	CMAP staff internally evaluates all applications and may contact applicants for additional information
October – December 2019	Feedback is accepted from all external partners and committees
Spring 2020	CMAP Board is presented with the selected program of projects for consideration
July 2020 – June 2023	Anticipated project timeframe for approved projects

### Project evaluation and selection criteria

The CMAP and RTA planning assistance programs encourage applicants to undertake a balanced, coordinated, and integrated approach to land use and transportation planning benefiting local communities. Applicants were encouraged to study the **ON TO 2050** priorities as well as the RTA's **Invest in Transit** goals when drafting their application to ensure that the proposed project addresses our region's planning priorities.

Both agencies have common priorities, including projects which:

- Support development of compact, walkable communities
- Match regional and local housing supply with the diversity of housing that serves the needs of the community
- Advocate for and develop policies that strengthen communities
- Incorporate market and fiscal feasibility into planning and development processes
- Encourage multijurisdictional partnerships and study areas
- Strengthen and make transit more competitive
- Target disinvested and economically disconnected areas
- Leverage the transportation network to promote inclusive growth

### Application Breakdown by County

Below is a breakdown of applications by County. Some project application study areas fall in multiple counties, therefore the list below counts some applications multiple times. Please see the map below for approximate locations of all applications received.
