# **Fox River Grove**

#### 2019 municipal emissions summary

This local emissions summary was developed as part of the 2019 greenhouse gas emissions inventory for northeastern Illinois. The summary is not an exhaustive inventory but captures greenhouse gas emissions from most major sources. It is intended to help decision makers understand key emissions sources and provide communities with the information needed to begin developing emissions reduction plans. For more details on the methods and data sources used to prepare the summary, please refer to the <u>local</u> <u>emissions summaries methodology</u>.

## **Emissions summary**

#### **Community characteristics**

| Population                            | 4,702     |
|---------------------------------------|-----------|
| Jobs (full- and part-time)            | 968       |
| Median household income               | \$112,917 |
| Share of owner-occupied housing units | 82%       |
| Land area (acres)                     | 1,115     |
| Tree coverage*                        | 44%       |
| Impervious surfaces*                  | 33%       |
| Greenest region compact member        | Yes       |
| *                                     |           |

\*percent of land area
