

README: CMAP's Land Use Inventory for Northeast Illinois, 2010

Description: Geodatabase and supporting documentation depicting land use in northeast Illinois broken out to 60 categories. In a departure from past practice, land uses were identified at the parcel level using parcel and assessor data provided by the seven northeast Illinois counties. Parcels were dissolved on common land use types, and polygons were generated for non-parcel areas (such as road rights-of-way) and assigned a general classification based on supplementary reference datasets.

Version 3 of the 2010 Land Use Inventory was posted on 13 May 2020 and supersedes earlier versions. V3 includes corrections to errors identified during the production phase of the 2015 Land Use Inventory.

NOTE: Due to size limitations, the shapefile version of the 2010 Inventory is not included as a part of this package. If you need the shapefile, please contact us at info-gis@cmapp.illinois.gov and we will arrange to get it to you.
