

README: CMAP's Land Use Inventory for Northeast Illinois, 2013

Description: Geodatabase and supporting documentation depicting land use in northeast Illinois broken out to 60 categories. This dataset is considered an update of the 2010 parcel-based Land Use Inventory, and the primary focus was on parcels whose assessment records or geometry had changed between 2010 - 2013, suggesting a change in land use. Parcels were dissolved on common land use types, and polygons were generated for non-parcel areas (such as road rights-of-way) and assigned a general classification based on supplementary reference datasets.

Version 2 of the 2013 Inventory includes numerous corrections to errors identified during the 2015 Land Use Inventory production phase and supersedes Version 1. Corrections are consistent with Version 3 of the 2010 Land Use Inventory. Posted 13 May 2020.

NOTE: Due to size limitations, the shapefile version of the 2013 Inventory is not included as a part of this package. If you need the shapefile, please contact us at info-gis@cmap.illinois.gov and we will arrange to get it to you.
