

README: CMAP's Land Use Inventory for Northeast Illinois, 2018

Description: GIS data (esri file geodatabase and shapefile) and supporting documentation depicting land use in northeast Illinois broken out to 57 categories. This dataset is considered an update of the 2015 parcel-based Land Use Inventory, and the primary focus was on parcels whose assessment records or geometry had changed between 2015 - 2018, suggesting a change in land use. Parcels were dissolved on common land use types, and polygons were generated for non-parcel areas (such as road rights-of-way) and assigned a generic "non-parcel" category.

NOTE: Due to size limitations, the shapefile version of the 2018 Inventory is not included as a part of this package. If you need the shapefile, please contact us at info-gis@cmap.illinois.gov and we will arrange to get it to you.
