

README: CMAP Travel Survey Data

Description:

CMAP completes regional household travel surveys for use in travel demand modeling. The surveys provide data on the demographic and travel behavior characteristics of residents in the greater Chicago area. CMAP uses this data for the continuing development and refinement of the Chicago regional travel demand forecast models.

Included in this archive are public-release datasets and documentation for four surveys; each is in its own .zip file, including a survey-specific README document serving as a guide to the contents.

CONTENTS

- **householdTravelSurvey_CATS_1990.zip**: CATS Household Travel Survey, 1990
- **travelTracker_2007_2008.zip**: Travel Tracker Survey, 2007 - 2008
