MEMORANDUM

To: Regional Coordinating Committee

From: CMAP Staff

Date: October 5, 2011

Re: Semi-annual GO TO 2040/TIP Conformity Analysis & TIP Amendments

In accordance with the biannual conformity analysis policy, CMAP staff asked programmers to submit changes to projects included in the regional air quality analysis of the Transportation Improvement Program (TIP) and GO TO 2040. We received responses from all programmers and specific TIP changes are listed in the attached report. Of the numerous changes requested only nine projects required air quality conformity action. TIP projects are comprised of various work types.

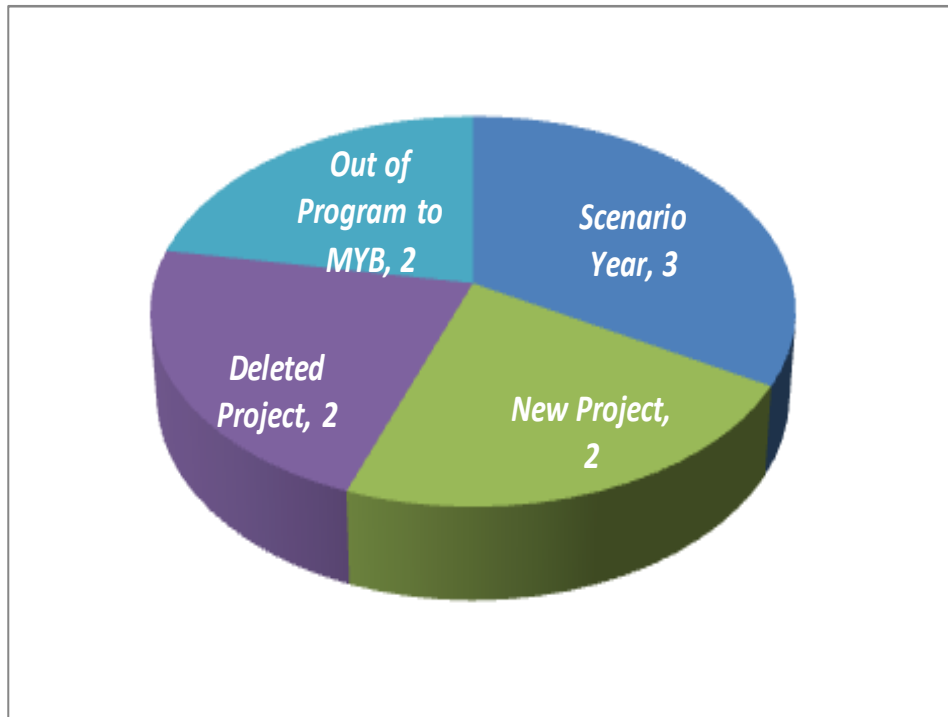

- An exempt work type does not require an air quality conformity analysis. Examples of exempt work types are road resurfacing and bus rehabilitation.
- Exempt tested work types do not require an air quality conformity analysis, but the region has chosen to include the impacts of the work types in the travel demand model. Exempt tested projects include lane widening and new commuter parking lots
- Non-exempt work types may affect air quality and must be tested for conformity. Examples of non-exempt work types are adding lanes to a road, signal timing and extending a rail line.

Changes include two new projects and two deleted projects. There was one project with a limit change. Limits are the cross-streets, mileposts or other boundaries which define the extent of a project.

Twenty-five projects changed completion year. Completion years indicate when a project is anticipated to be in service to users and determines what analysis years the project will be considered in. The current conformity analysis includes four analysis years, 2016, 2020, 2030 & 2040. When a project's completion year change puts it into a different analysis year, a new conformity analysis is required. Only three of those projects, TIP ID 07-96-0013 Joe Orr Road changed from 2015 to 2020, TIP ID 12-07-0020 I-55 from Lorenzo Road to IL 129 from 2015 to 2018, and TIP ID 11-00-000 IL 31 from IL 120 to IL176 from 2015 to 2020 had a completion year

change affecting the analysis year. Two projects TIP ID 09-02-9008 I-90 Northwest Tollway from Newburg Rd to Plaza 9 – Elgin MP 17.0-45.0 which also has a limit change and TIP ID 10-94-0014 Pulaski from O’Plaine Road to IL43 have moved out of the program years (11-15) to MYB (the multi-year B program).

The following chart shows a break-down of the type of project changes requested.

The 2016, 2020, 2030 and 2040 highway networks were coded to include the project changes listed in the Non-Exempt Projects Requiring Conformity Determination report. The regional travel demand model was run using the updated networks. The resultant vehicle miles traveled (VMT) by speed and facility type for eight vehicle classes was expanded to the twenty-eight vehicle types needed for use with USEPA’s MOBILE model. The on-road emission estimates are the sum of those emissions for each precursor or direct pollutant in each scenario year. Reductions from the National Energy Policy Act Credit and Clean Fuel Fleet Program have not been claimed.

For ozone precursors, the resulting emissions estimates fell below the applicable attainment demonstration SIP budgets.

Since there are no SIP budgets for annual direct PM_{2.5} and NO_x emissions, these estimates were combined with estimates from northwest Indiana, which is also part of the nonattainment area. The combined direct PM_{2.5} and NO_x emissions remain below emissions estimates for 2002, the baseline year.

Northeastern Illinois Transportation Improvement Program TIP Amendment October 13, 2011 Conformity Analysis Summary Results

Direct PM_{2.5} and NO_x Emissions in Tons per Year for PM_{2.5} Conformity

Year	Fine Particulate Matter			Nitrogen Oxide		
	Northeastern	Northwest	Nonattainment	Northeastern	Northwest	Nonattainment
	Illinois	Indiana	area Total	Illinois	Indiana	area Total
2002	3,070.78	562.64	3,633.42	167,630.81	30,397.97	198,028.78
2016	1,073.93	112.28	1,186.21	40,800.91	3,929.58	44,730.49
2020	969.53	104.73	1,074.26	27,727.06	2,734.46	30,461.52
2030	957.10	109.53	1,066.63	19,099.32	1,963.33	21,062.65
2040	1,003.50	122.52	1,126.02	19,304.80	2,110.97	21,415.77

conformity is demonstrated by comparison of analysis year emissions to the baseline year (2002)

VOC and NO_x Emissions in Tons per Summer Day for Ozone Conformity

Year	Volatile Organic Compounds		Nitrogen Oxides	
	Northeastern		Northeastern	
	Illinois	SIP Budget	Illinois	SIP Budget
2016	61.31	133.78	110.13	284.65
2020	52.50	73.68	74.07	88.17
2030	51.97	73.68	49.47	88.17
2040	55.61	73.68	49.62	88.17

conformity is demonstrated by comparison of analysis year emissions to the SIP budgets

Notes

Off-model benefits are not included in the total emissions estimates

NIRPC emissions from June 23, 2011 conformity analysis, assuming construction of Cline Avenue Bridge

ACTION REQUESTED: Approval
