# **Livable Communities**

# Achieve Greater Livability through Land Use and Housing

Implementation Action Area #1: Provide Funding and Financial Incentives

Action	Lead	Specifics
	Implementers	
Align funding for	State (IDOT,	CMAP, IDOT, and RTA should coordinate
planning and ordinance	DCEO,	funding programs to fund local plans and
updates	IHDA), RTA,	ordinance updates. Use funds to create new
	CMAP,	streamlined grant program for transportation,
	counties,	land use, and housing which assists local
	municipalities,	governments to create plans or ordinance updates
	philanthropic	that are consistent with GO TO 2040. This
		program should be able to fund ordinance
		changes, updates to local programs or policies, or
		similar activities, as well as plan preparation.
		Supplement these funding sources with
		philanthropic or other public and private sources
		as appropriate. In particular, funding from
		housing and economic development sources
		should also be included within this streamlined
		program.

- CMAP and the RTA have coordinated for three years running to hold joint applications
  for the RTA's Community Planning program and CMAP's Local Technical Assistance
  program. <a href="http://www.cmap.illinois.gov/lta/call-for-projects.">http://www.cmap.illinois.gov/lta/call-for-projects.</a>
   Both programs offer
  consultant assistance, but also staff assistance, depending on the community's needs.
- Beyond transportation sources, funding from HUD and IEPA has also been used to support consultant assistance. In addition, CMAP has sought funding from other federal, state, and philanthropic sources to supplement its transportation funding; some funds for staff assistance have been secured to date, and several applications that include consultant assistance are currently being considered.

Action	Lead	Specifics
	Implementers	
Implement and expand	Federal	The federal government should apply the
the Sustainable	(HUD, U.S.	principles of the Sustainable Communities
Communities Initiative	DOT, U.S.	Initiative across other federal programs as well.
program	EPA, DOE,	Its administering departments (HUD, U.S. DOT,
	EDA)	and U.S. EPA) should also commit sufficient funds
		in future years to make it a significant funding
		source for plan implementation, not just plan
		development. Federal agencies should also align
		federally-required planning efforts, such as HUD
		Consolidated plans, with GO TO 2040 priorities,
		and federal investment should be geared to
		implement planning efforts that are consistent
		with the principles of the Sustainable
		Communities Initiative.

- HUD funding to support the Sustainable Communities Initiative was made available in federal FY 10 and FY 11, but not since that time. USDOT initiated the TIGER grant program as part of the Sustainable Communities Initiative, and this program is still active. Funding for both programs is in the President's FY 14 budget: <a href="http://www.cmap.illinois.gov/policy-updates/-/blogs/white-house-releases-fy-2014-budget-proposal">http://www.cmap.illinois.gov/policy-updates/-/blogs/white-house-releases-fy-2014-budget-proposal</a>
- HUD began a "Preferred Sustainability Status" program to prioritize funding to regions
  that are consistent with the goals of the Sustainable Communities Initiative. This
  provides applicants from these regions with two bonus points in certain HUD
  applications. HUD is also working with other agencies to incorporate Preferred
  Sustainability Status into their competitive programs as well.
- Locally, CMAP has begun working with Cook County to create one document that functions as both the HUD Consolidated Plan and EDA Comprehensive Economic Development Strategy.

Action	Lead	Specifics
	Implementers	
Develop regional	State (IDOT),	Create a pilot program meant to focus
infrastructure funding	RTA, CMAP,	infrastructure funds to implement local
programs for plan	counties,	comprehensive plans, modeled on programs in the
implementation	COGs	Atlanta and San Francisco regions. Allocate a
		portion of funds currently programmed by the
		state (STP) and by CMAP (CMAQ) for this
		purpose. Retain the current programming of local
		STP funds, but encourage programmers to
		consider livability in their funding decisions.

- Research on this issue is part of CMAP's work plan in FY 13. This new core program
  will coordinate staff efforts to optimize MPO programming functions (CMAQ,
  Transportation Alternatives) and to develop the region's capacity to evaluate the larger
  universe of transportation expenditures and needs in northeastern Illinois. The intention
  is to target these process and evaluation improvements to achieve adopted regional
  mobility goals.
- CNT released a report in 2012 that called for increased focus on this recommendation of GO TO 2040. Entitled <u>Prospering in Place</u>, the report recommends focusing investments based on three strategies: transit-oriented development (TOD), cargo-oriented development (COD), and job centers with limited transit access.

#### Implementation Action Area #2: Provide Technical Assistance and Build Local Capacity

Action	Lead	Specifics
	Implementers	
Continually review status	RTA, CMAP,	Update the Compendium of Plans every two years.
of local plans	counties,	Use its findings to target planning technical
	municipalities	assistance. This could include comprehensive
		planning assistance to communities that do not
		have current plans, and assistance with
		implementation to those that do. Also use results
		to identify missing or underemphasized elements
		of local comprehensive plans, such as housing
		affordability or water conservation. Include
		review of plan implementation status for plans
		funded through RTA grants.

- CMAP staff updated the Compendium of Plans in 2012, posting a Policy Update at <a href="http://tinyurl.com/lvlx4de">http://tinyurl.com/lvlx4de</a>. To remain relevant and influential, municipal comprehensive plans should be updated every 5-10 years. The Policy Update describes the ages of the comprehensive plans in effect for the region's municipalities.
- CMAP staff have transitioned from comprehensive analysis of 284 plans to conducting the Municipal Plans, Programs, and Operations Survey on a biannual basis. The survey has been conducted in 2010 and 2012. Analysis of the 2010 survey was posted as a Policy Update (part 1 and 2).
- CMAP has used data collected through the survey to measure demand for treatment of
  planning topics under the Model Plans, Ordinances, and Codes project. Staff have
  completed several of these toolkits, designed to help interested municipalities
  implement GO TO 2040 recommendations at the local level, including parking, urban
  agriculture, form based codes, arts and culture, and climate change adaptation.
  <a href="http://www.cmap.illinois.gov/local-ordinances-toolkits">http://www.cmap.illinois.gov/local-ordinances-toolkits</a>

Action	Lead	Specifics
	Implementers	
Create model ordinances	CMAP,	Develop sample ordinances or codes in areas
and codes	counties,	relevant to GO TO 2040 that can be adapted by
	municipalities	local governments. Examples include water
		conservation ordinances, housing rehabilitation
		codes, and parking regulations. At the same time
		that model ordinances are under development,
		work with a few case study communities to ensure
		that they can be adapted to work locally. CMAP
		should also promote best planning practices
		through publications highlighting local approaches
		to these issues.

- CMAP established the Model Plans, Ordinances, and Codes project in the agency's FY 2013 work plan. Since then, the agency has posted eight reports responding to demand identified through analysis of data collected through the 2010 and 2012 Municipal Plans, Programs, and Operations Surveys. <a href="http://www.cmap.illinois.gov/local-ordinances-toolkits">http://www.cmap.illinois.gov/local-ordinances-toolkits</a>
- CMAP produced a Model Water Use Conservation Ordinance seeks to provide guidance
  in adopting measures that promote better water use management. Adopting items from
  the Model Ordinance may result in indoor water use savings ranging from 2,400
  gallons/household/year to 11,500 gallons/household/year through simple household
  actions and more complex policy change. CMAP has provided technical assistance to
  Evanston, Oak Park, and Orland park to help these communities increase water
  efficiency. <a href="http://www.cmap.illinois.gov/model-water-conservation">http://www.cmap.illinois.gov/model-water-conservation</a>
- CMAP released a Parking Strategies to Support Livable Communities report to help communities address their parking concerns with the end goal of making our communities more livable. The paper explains how to do a parking survey, how to effectively engage stakeholders, and describes more than a dozen strategies to manage parking; it also takes a detailed look at the costs of parking structures and available financing mechanisms. CMAP is now working with both Hinsdale and the Wicker Park Bucktown SSA to study and address parking challenges through management. <a href="http://www.cmap.illinois.gov/parking-strategies-to-support-livable-communities">http://www.cmap.illinois.gov/parking-strategies-to-support-livable-communities</a>
- CMAP has developed the report, Municipal Strategies to Support Local Food Systems, a
  two part document consisting of a guide, Including Local Food in Comprehensive Plans,
  and an Urban Agriculture Ordinance Toolkit. <a href="http://www.cmap.illinois.gov/local-food-toolkit">http://www.cmap.illinois.gov/local-food-toolkit</a>
- CMAP produced the Climate Adaptation Guidebook for Municipalities in the Chicago Region as a resource for communities interested in adapting their planning and investment decisions to a changing climate. <a href="http://www.cmap.illinois.gov/climate-adaptation">http://www.cmap.illinois.gov/climate-adaptation</a>
- CMAP has created a toolkit to help municipalities incorporate arts and culture into their communities, enhance livability by improving quality of life, and become more

attractive places to live, work, and play. It offers a primer on different types of arts and culture and their inherent primary needs and secondary impacts, then proceeds to detail steps that can be taken by communities. <a href="http://www.cmap.illinois.gov/arts">http://www.cmap.illinois.gov/arts</a>

Action	Lead	Specifics
	Implementers	
Research and explore	CMAP,	Research alternative systems such as SmartCode
alternative land use	counties,	and FBC that address structure, form, and
regulation systems	municipalities,	placement over conventional use-based, Euclidean
	nonprofits	zoning approaches. Coordinate with communities
		that have adopted alternative land use regulatory
		systems, assess performance, and provide
		resources and training for other communities
		interested in these methods.

• As communities have sought to reinvigorate their downtowns or create viable commercial corridors, many have found that conventional methods of zoning, oriented around regulating land use, may not address certain physical characteristics that contribute to the sense of place in a community. Form-based codes, which emphasize the physical character of development, offer an alternative. CMAP produced Form Based Codes: a Step-by-Step Guide for Communities to explain what form-based codes are and how they are created to help communities assess whether they may be right for them. <a href="http://www.cmap.illinois.gov/local-ordinances-toolkits">http://www.cmap.illinois.gov/local-ordinances-toolkits</a>

Action	Lead	Specifics
	Implementers	
Analyze ordinance	CMAP,	In partnership with interested communities,
outcomes	counties,	CMAP should review existing ordinances to
	municipalities,	quantitatively analyze their impacts (in terms of
	nonprofits	stormwater runoff, local fiscal impacts, resulting
		housing cost, contributions to greenhouse gas
		emissions, and others). Also create visualizations
		that improve understanding of the outcomes of
		current ordinances.

- By the time the GO TO 2040 plan has been updated, CMAP and our partners will have produced *Homes for a Changing Region* housing policy plans for 26 municipalities. These plans each include an analysis of municipal land use policies. Specifically, each *Homes* plan provides an analysis of each municipality's capacity to develop or redevelop housing under current policies through the year 2040. <a href="http://tinyurl.com/lg9cyb2">http://tinyurl.com/lg9cyb2</a>
- The agency provided data and analysis support to Seven Generations Ahead to help measure the impact of <a href="PlanItGreen: The Environmental Sustainability Plan for Oak Park and River Forest">PlanItGreen: The Environmental Sustainability Plan for Oak Park and River Forest</a>. CMAP created new VMT estimates, based on vehicle emissions data that are more responsive to policy than previous methods.

Action	Lead	Specifics
	Implementers	
Provide assistance in	CMAP	In partnership with interested communities,
planning for affordable	counties,	research local housing supply and demand and
housing needs	municipalities,	identify appropriate housing strategies. Provide
	nonprofits	direct technical assistance, in collaboration with
		other regional civic organizations, to communities
		seeking to develop a balanced supply of housing
		through locally-appropriate strategies such as
		community land trusts, land banking, housing
		preservation, employer assisted housing,
		inclusionary zoning, removal of regulatory
		barriers, strategies for vacant or foreclosed
		properties, furthering fair housing goals, or
		community acceptance strategies. Support local
		work through regionally-sponsored research such
		as the "Homes for a Changing Region" reports, the
		"Home Grown" best practices summary, or similar
		efforts.

- In partnership with the Metropolitan Mayors Caucus and Metropolitan Planning Council, CMAP will have produced <u>Homes for a Changing Region</u> housing policy plans for six groups, totaling 26 municipalities. These plans include an analysis of each municipality's existing and forecasted housing supply and demand. They also provide policy and strategic recommendations to create a balanced and sustainable future housing supply that responds to forecasted demand. Many of these plans have produced real and notable implementation results. Examples include the following:
  - The Village of Lansing has completed a comprehensive plan to implement several recommendations from *Homes*.
  - The Village of Olympia Fields has completed a TOD plan update that increases housing diversity near the 203rd Street Metra Station.
  - The West Cook County Housing Collaborative has won more than \$7 million in state and federal grants to update comprehensive plans, develop housing near train stations, and rehabilitate single-family homes.
  - The Village of Arlington Heights has adopted a resolution to create an affordable housing trust fund.

Action	Lead	Specifics
	Implementers	
Use and enhance existing	CMAP,	Strategically deploy CMAP's Centers Toolkit, ROI
assistance technical	counties,	tool, MetroQuest software, and the Metropolitan
assistance software tools	municipalities,	Planning Council's (MPC) Placemaking program.
	nonprofits	Develop an online "library" of best planning
		practices by local governments, to be continually
		updated and improved as technical assistance
		activities continue.

- CMAP and the Village of Park Forest developed an interactive, online website for
  residents to express their support for the different strategies to include in the Village's
  sustainability plan. Users were able to rank their top goals and then choose the strategies
  they would support. After selecting strategies, users were able to compare the relative
  impact on achieving village-wide sustainability versus the relative cost to implement
  each strategy. All of this input was used to prioritize the plan's top strategies.
- Following the completion of the Berwyn Comprehensive plan, CMAP worked with the
  City to update its zoning code so that it would align with the new plan's stated goals. To
  help engage the public and better educate them on the potential impacts of a new zoning
  code, CMAP and the City developed an online, interactive website to gather public
  input. The site focused on three distinct corridors and provided residents the
  opportunity to select images that best represented the types of development and signage
  they thought should be included in each district.
- Staff worked with MetroQuest to create a particularly innovative web application to
  gather input from residents and business owners for the Hinsdale parking study. The
  application asked users to select from a series of parking management strategies,
  including demand-based pricing, expanded on-street parking, building a parking
  garage, supporting active transportation, and increasing enforcement fines. Based on
  the strategies selected, the app responded with ramifications to parking availability,
  distance to parking, cost of parking, cost to the municipality, traffic congestion, and
  biking and walking.

Action	Lead	Specifics
	Implementers	
Target technical	CMAP, RTA,	Create menu of assistance "offerings" consistent
assistance to	counties,	with GO TO 2040, and clearly evaluate requests for
communities	municipalities,	assistance based upon conformance with these
demonstrating interest in	nonprofits	plan objectives. Proactively identify opportunities
furthering GO TO 2040		to provide community assistance.

- During the annual call for LTA applications, CMAP staff work proactively to identify
  opportunities for GO TO 2040 implementation strategies in specific communities. Staff
  then reached out to those communities to suggest project ideas. Interested communities
  then submit applications for LTA projects.
- Among the criteria used to prioritize projects for support under CMAP's LTA program, consistency with GO TO 2040 objectives is perhaps the most important. The agency only selects projects that help to implement the recommendations of the plan. Before staff or consultant assistance is provided, local governments must pass resolutions that acknowledge that LTA support is provided to implement GO TO 2040.

Action	Lead	Specifics
	Implementers	
Sponsor Planning	CMAP,	Provide a cycle of Planning Commissioner
Commissioner	counties,	Workshops throughout the region every two
workshops	municipalities,	years. Workshops will cover such issues as the
	nonprofits	importance of updating comprehensive plans,
		consistency of local ordinances with
		comprehensive planning policy, making
		defensible land use decisions, roles of planning
		commissions and zoning boards of appeals, and
		placing local land use decisions within a regional
		context. These also can include special sessions on
		topics of interest, such as transit-supportive land
		use, energy conservation, or parking regulation, to
		name a few.

• CMAP has partnered with the Illinois chapter of the American Planning Association and the Chaddick Institute for Metropolitan Development at DePaul University to provide planning commissioner training workshops to groups of municipalities that have also received staff support under the LTA program. Workshops are provided free-of-charge and open to planning commissioners in surrounding communities. CMAP has provided 7 of these workshops since the LTA program began.

### Implementation Action Area #3: Support Intergovernmental Collaboration

Action	Lead	Specifics
	Implementers	
Encourage formation of	CMAP, RTA,	Encourage COGs and counties to lead formation
formal collaborative	counties,	of issue-specific collaborative planning groups to
planning efforts	COGs,	address issues such as housing, transportation,
	municipalities	economic development, land use, water and
		related environmental issues, or others. Provide
		technical assistance to existing collaborative
		groups in research and mapping, developing
		model ordinances and overlay districts, seeking
		funding, interacting with state and federal
		agencies, and entering into intergovernmental
		agreements.

- CMAP encourages groups of local governments to apply for technical assistance through the LTA program and has or will complete 32 such projects over the next several years.
- Based on the recommendations of the Blue Ribbon Advisory Council for the IL 53/120 major capital project, CMAP is working with the Tollway and Lake County to prepare a multijurisdictional land use plan for the 53/120 corridor.

Action	Lead	Specifics
	Implementers	
Form collaborative	Counties,	Encourage the formation of collaborative groups
groups to address	COGs,	to address affordable housing across
affordable housing	municipalities,	communities. These can be broad (such as the
across communities	nonprofits,	South Suburban Housing Collaborative) or
	developers,	specifically targeted to a specific housing issue
	other housing	(such as the Preservation Compact and the Lake
	stakeholders	County Preservation Initiative). These groups
		should include a broad array of housing industry
		stakeholders and should explore various funding
		mechanisms to produce strategies that are nimble
		and specific to the current housing market.

- The Metropolitan Mayors Caucus has provided ongoing technical assistance, with support from the Metropolitan Planning Council, to help groups of communities formalize interjurisdictional housing collaboratives that address housing issues crossing municipal boarders. This has resulted in the formation of three housing collaboratives. Thanks in large part to fundraising done by the Mayors Caucus, each collaborative benefits from one shared staff coordinator.
- CMAP has provided <u>Homes for a Changing Region</u> projects to the three interjurisdictional housing collaboratives in the region: the South Suburban Housing and Community Development Collaborative (as represented by Hazel Crest, Lansing, Olympia Fields, and Park Forest); West Cook County Housing Collaborative (Bellwood, Berwyn, Forest Park, Maywood, and Oak Park); and the Northwest Suburban Housing Collaborative (Arlington Heights, Buffalo Grove, Mount Prospect, Palatine, and Rolling Meadows).

Action	Lead	Specifics
	Implementers	
Prioritize funding to	Federal (HUD,	Provide financial incentives for involvement in
communities engaging in	U.S. DOT, U.S.	collaborative groups by prioritizing funding to
intergovernmental	EPA), state	communities that apply for funding jointly and
planning	(IHDA, IDOT,	develop programs across municipal borders.
	DCEO)	Selection criteria in funding programs should
		recognize and reward intergovernmental
		applicants.

- Through the Sustainable Communities Initiative, HUD funded the West Cook County Housing Collaborative and the South Suburban Mayors and Managers to create loan funds that would increase TOD in two key subregions. CMAP has supported both efforts by developing tools to prioritize parcels for redevelopment based on data.
- The Illinois Housing Development Authority provides additional formula points to developers proposing affordable housing projects that would implement interjurisdictional housing plans, like *Homes for a Changing Region*, in its 2013 Qualified Allocation Plan.
- The Illinois Attorney General provided funding through the National Foreclosure Settlement Awards that encourages interjurisdictional coordination on foreclosure response in several areas across the region. CMAP received a grant to support such collaboration in the Fox River Valley in Kane County, Lake County, Northern Will County, and McHenry County.

Action	Lead	Specifics
	Implementers	
Facilitate communication	CMAP,	Support initiatives by COGs or counties that bring
between communities	counties,	municipalities together in coordinated planning
facing similar challenges	COGs,	activities and information-sharing. CMAP should
	municipalities	work with staff of the counties and COGs to help
		coordinate these efforts. CMAP should also
		identify communities sharing similar features
		facing similar planning challenges, and provide a
		facilitated environment to bring them together to
		work on solutions and share ideas collaboratively.

- In May of 2012, CMAP convened nearly 200 local planners, elected officials, stakeholder groups, and other residents at an <a href="Ideas Exchange">Ideas Exchange</a> event, where The Chicago Community Trust announced significant planning grants to five community-based projects. The event program featured sessions on how communities can tap into planning staff and grants to address planning issues. It also included opportunities for interested communities to network with other technical assistance providers, including federal agencies, regional transportation agencies, nonprofit groups, and others.
- CMAP supports periodic meetings hosted by the Counties and COGs by providing transportation programming updates, presentations on new agency resources of interest, and opportunities for communities to receive technical assistance.

### Implementation Action Area #4: Link Transit, Land Use, and Housing

Action	Lead	Specifics
	Implementers	
Identify and exploit	CMAP, RTA,	Many communities have embraced TOD as a
additional opportunities	CTA, Metra,	strategy to revitalize their downtowns, and plans
for transit oriented	Pace, counties,	for many of the most obvious locations for TOD
development	municipalities	have already been prepared. CMAP and other
	nonprofits	regional civic organizations should identify other
		potential opportunities for application of TOD
		strategies and initiate pilot TOD projects in areas
		where TOD is more difficult (i.e., locations with
		difficult land assembly, bus-based TOD, etc.).

- CMAP has coordinated with the Regional Transportation Authority (RTA) on providing technical assistance to local governments for the purpose of advancing TOD. Over the past several years, the agencies have used one common application process for communities interested in receiving technical assistance through either CMAP's LTA or RTA's Community Planning Program. The agencies work together to determine the applications appropriate for each program.
  - http://www.rtachicago.org/implementation/tod-plan-implementation.html

Action	Lead	Specifics
	Implementers	
Use livability principles	Counties,	Counties and municipalities should pursue
to plan for land use in	municipalities	opportunities for more dense development which
development near transit		mixes uses and housing types within "location
		efficient" areas near transit services. Counties and
		municipalities can increase density by providing
		density bonuses (in exchange for affordable units),
		creating transit overlay districts, or using form-
		based codes to address community fit. This can
		occur both for existing transit services and areas
		where transit expansion is planned, and applies to
		both rail and bus service.

- CMAP completed an LTA project for the <u>City of Berwyn</u> to create a Comprehensive Plan. Among others, it recommends several strategies to create a vibrant, livable community, including converting existing vacant and underutilized commercial properties into high-quality developments that cater to the needs of residents and visitors; concentrating commercial uses along major intersections to create pedestrian and transit-friendly development nodes at major street intersections; and continuing to develop the Depot District as Berwyn's cultural and economic hub in partnership with MacNeal Hospital and existing stakeholders within the District.
- CMAP also completed a Comprehensive Plan for The <u>City of Blue Island</u>. Its recommendations encourage 'Node Commercial' development at major intersections along Western Avenue, the Uptown District, and Vermont Street Metra station area. These parcels should accommodate high density and pedestrian oriented mixed-use developments with residential units above retail spaces. The plan also recommends promoting high density, mixed-use, and walkable Transit Oriented Development within the Vermont Street station area that will support revitalization of the City's Uptown District. Finally, the plan encourages new multi-family housing and mixed-use developments in strategic locations throughout the community.
- The Village of <u>Campton Hills</u> sought out technical assistance from CMAP's LTA
  program to create and adopt a single, stand-alone comprehensive plan to unify a series
  of local plans and ordinances and provide a vision for the future. One of the plan's
  recommendations calls for mixed use centers that would be relatively compact and
  provide needed commercial amenities, but also help preserve the natural environment
  in the remainder of the community.

Action	Lead	Specifics
	Implementers	
Promote housing	Counties,	Proximity to transit services often increases land
affordability near transit	municipalities	value, making it more difficult to provide a range
		of housing. Counties and municipalities should
		analyze housing needs near transit services, and
		can provide a variety of incentives to developers
		to bring down development costs in exchange for
		affordable units. These tools include land
		donations, density bonuses, permit fee waivers,
		land trusts and expedited permitting processes.
		These should be explored, considered, and
		adapted to specific local situations.

• In the agency's 2013 Qualified Allocation Plan, IHDA awards extra points to developers proposing affordable housing developments near transit or recommended in transit-oriented development plans.

Action	Lead	Specifics
	Implementers	
Target housing programs	Federal	Affordable housing grant programs should give
to rehabilitation in areas	(HUD), state	high priority to preserving the existing affordable
with transit access	(IHDA),	housing stock, particularly in TODs.
	counties,	
	municipalities	

Action	Lead	Specifics
	Implementers	
Require supportive land	RTA, CTA,	Consider supportive land use when making
use planning before new	Metra, Pace	investment and programming decisions. The
transit investment is		service boards should prioritize investments (new
made		service in particular) in areas that have or are
		planning for land use and local infrastructure that
		supports transit.

• In a joint effort, the CTA, Chicago Department of Transportation, Department of Housing and Economic Development, and the Federal Transit Administration conducted a year-long study of alternatives for Bus Rapid Transit (BRT) that could be located either on Ashland or Western Avenue. Analysis and public input resulted in the decision to plan for 16 miles of <a href="BRT along Ashland Avenue">BRT along Ashland Avenue</a> from Irving Park to 95th Street. The first phase of the project, focusing on the segment from Cortland to 31st Street, has begun with continued opportunities for public input.

Action	Lead	Specifics
	Implementers	
Update guidelines for	RTA, CTA,	Update materials produced by the transit service
transit-supportive land	Metra, Pace	boards concerning land use planning and small-
use		scale infrastructure investments that support
		transit. These materials should include additional
		topics such as housing affordability that go
		beyond the density and design issues which are
		currently included.

- Pace Suburban Bus produced a <u>Transit Supportive Guidelines</u> website with information resources to help communities encourage land uses and configurations that support bus transit. According to Pace, these Guidelines present principles and standards that may be implemented by municipalities, designers, engineers, and many others. As stated on the website, the ultimate vision is to provide a higher level of bus service to places that actively remove barriers to transit as a viable transportation choice.
- RTA similarly provides resources on its website to local governments interested in
  encouraging TOD. Recently updated resources include <u>Making Way: A Guide for</u>
  Communities to Promote Pedestrian Mobility and Increase Access to Existing Transit;
  Setting the Stage for Transit; Streamlining the Entitlement Process for Transit-Oriented
  Development; and <u>Municipal Funding Sources for Transit-Oriented Development</u>.
