

## MEMORANDUM

**To:** Freight Committee  
**From:** Tom Murtha  
**Date:** May 13, 2010  
**Re:** Truck Route Planning

---

---

We are engaged in a process to identify local-designated truck routes. In addition, when we have completed this identification, we will be working with local communities, the Illinois Department of Transportation, counties, and industry stakeholders to improve the truck route system.

To assist in this effort, we will be using the following geographic data. If there is additional data we should be using, please let us know.

Base map data to identify existing routes:

- Truck routes previously identified by IDOT
- CMAP-identified truck routes depicting routes identified by ordinance
- Municipal boundaries
- Regional Highway System
- Local Streets
- Rivers
- Rails

Additional data to be used in planning application:

- Employment
- Land use
- Intermodal terminals
- Strategic regional arterials
- National Highway System
- National Highway System Intermodal Connectors
- Highway jurisdiction
