

Recommended Policies to be Employed by the Executive Committee  
when Considering Requests for the Use of Advance STP Funds

1. The construction phase of any project for which the Executive Committee has approved the use of advance STP funds must receive federal authorization within the federal fiscal year that the use of said advance STP funds were approved. In such case where the federal authorization is not given, the approved advance funding will expire.
2. A request for advance funding for an engineering or right-of-way phase of a project may not be submitted to the Executive Committee for consideration without documentation that the executed local agency agreement has been forwarded by IDOT District 1 to IDOT Central Office.
3. A Council requesting the use of advance STP funds cannot have another project programmed in the selected year of the TIP at the time of the request. A Council must have an insufficient estimated STP fund balance to fund the project in question prior to requesting the use of advance STP funds.
