- 6.0 Next Plan: Place-Based Approach Alternatives**
One goal of the next plan's development is to provide actionable guidance for implementers via more detailed policy recommendations and greater geographic specificity for some policy areas. "Place-based approaches" are used by many peer MPOs to provide locally appropriate recommendations within the context of their regional plans. Staff will share two place-based approach alternatives – typologies and layers – and discuss their potential utility for the next plan.

7.0 Policy Updates: Using American Community to Survey to Understand Recent Demographic and Transportation Trends

On December 3, 2015, the U.S. Census Bureau released its 2010-2014 American Community Survey (ACS) 5-year estimates. The ACS collects information such as ancestry, educational attainment, income, employment, and housing characteristics. This data release marks the first time that users are able to compare two non-overlapping 5-year ACS datasets (2005-2009 and 2010-2014), and the first time that many of the region's smaller communities will be able to see this change for their jurisdictions. Using this data, CMAP staff published a series of policy updates on **race and ethnicity**, transportation **mode share**, the growing **senior population**, **commute time** trends, and changes in household **median income**. Staff will summarize key findings.
