

CMAQ Project Selection Committee
February 18, 1999
10:00 AM

Cunningham-Williams Conference Room
300 West Adams, 2nd Floor

Agenda

1. Public comment on FY 98-99 proposals

The comment period ends Tuesday, February 16. Any public comment received on the proposed program will be addressed. No comments have been received as of February 10.

2. Adjustment of bike/ped methodology

The bike/ped rankings depend in part on the population surrounding the project. It is proposed that NIPC 2000 quarter-section population forecasts be used, rather than the currently employed 1990 census traffic analysis zone counts. The geography is easier to use and the population estimates will reflect recent growth.

3. Stalled FHWA administered projects

A status report will be given regarding each of these projects.

4. Stalled FTA administered projects

A draft staff proposal to address the potential loss of funding to the region as a result of stalled projects has been distributed. The current and proposed procedures will be reviewed and discussed.

5. Other Business

6. Next meeting
