

Tier 2 Consultation Meeting

May 4, 2004

10:00 AM

CATS Southeastern (Sun) Conference Room

Agenda

1. Approval of the draft February 9, 2004 meeting summary
Consultation team approval will be sought.
2. Brisbin Road and I-80 Interchange
The Interstate 80 interchange at Brisbin Road project level conformity analysis is complete. As anticipated, the emission results including the interchange project were very similar to emission estimates from the current conformity analysis documentations for the 2030 RTP and the FY 2004-2009 TIP for both VOC and NOX. The process and timeline for bringing this project into the TIP will be discussed.
3. 2030 RTP Update
Progress on the update to the long range transportation plan will be discussed.
4. Inspection & Maintenance Program
Status of funding for the I&M program will be addressed.
5. Projects of Air Quality Benefit
A brief discussion of this program to continue to monitor and report on projects that have air quality benefits now that the region has met its requirement under the State Implementation Plan for Air Quality will be held.
6. 8-hour Ozone Standard
A status report on the 8-hour ozone standard and PM designations will be given. Discussion of the timings for the required conformity analyses will occur.
7. 2000 Census Implications
Details on the progress and plans for the five activities identified as requiring action based on the 2000 Census will be given. Consultation team direction will be discussed.
8. Other business
9. Next Meeting
