The next step in the development of the ON TO 2050 Alternative Futures process is creating a memo, surveys, and an interactive app for each of the five futures selected for further analysis. Each memo will provide more detail on the key trends driving the future, the most important impacts of these trends on the region, and strategies for CMAP and partners to respond. Staff will update the committee on progress made in the walkable communities future, where residents have increased preference for walkable, mixed-use communities.
