4.0 **ON TO 2050: Municipal capacity strategy paper update** – Patrick Day, CMAP

Experience working with communities following the development of GO TO 2040 has highlighted that, while many municipalities in the region wish to be partners in implementing the plan, they lack capacity and face barriers that could be overcome with targeted strategies assistance. In response, CMAP staff, in conjunction with the Metropolitan Planning Council, are exploring policy reforms and strategies to assist municipalities in the future implementation of ON TO 2050. Staff will present initial findings and draft strategies under consideration.

5.0 **ON TO 2050: Financial plan update** – Lindsay Hollander, CMAP

As required by law, CMAP must prepare a financial plan to ensure adequate resources are available to support the investments and policies included in the long-range transportation plan. Previous [forecasts](#) found that revenues will be insufficient to fiscally constrained expenditures for operations and maintenance -- and will be unable to constrain any expansion and enhancement activities -- over the ON TO 2050 planning period. As a result, additional revenues will be needed to meet the region's transportation investment goals. Staff will present initial policy recommendations and forecasts for five reasonably expected revenues, as summarized in [this memo](#).

6.0 **ON TO 2050: Non-motorized transportation snapshot update** – Lindsay Bayley, CMAP

Enabling safe, convenient, and comfortable non-motorized transportation options for all our region’s residents will help to create vibrant communities, improve equity and public health, and support local economies. As more and more pedestrians and bicyclists take to the streets, ensuring their safety is of the utmost importance. This snapshot report investigates safety for pedestrians and bicyclists, trends in bicycling, trends in walking, and the importance of creating walkable places. Staff will present findings.
