Re: Draft ON TO 2050 Inclusive Growth Economy Kindred Indicators

Following an approach established in GO TO 2040, the ON TO 2050 plan will include various topic-specific indicators, which are a set of performance measures to benchmark the region's progress on plan implementation. The final set of indicators should highlight and complement all of the major recommendations made in ON TO 2050.

During the development process, CMAP staff have explored refinements to existing policy, as well as new policy topics not included in GO TO 2040. Through strategy papers, CMAP staff have engaged in rigorous research that will shape the next plan's recommendations. Given recent research on the relationship between opportunity and economic growth, CMAP staff identified inclusive growth as a key priority for ON TO 2050, establishing it as one of only three overarching principles guiding strategies in the next plan. Inclusive growth will inform ON TO 2050 recommendations, cutting across CMAP's core policy areas of regional economy, land use, environment, governance, and mobility.

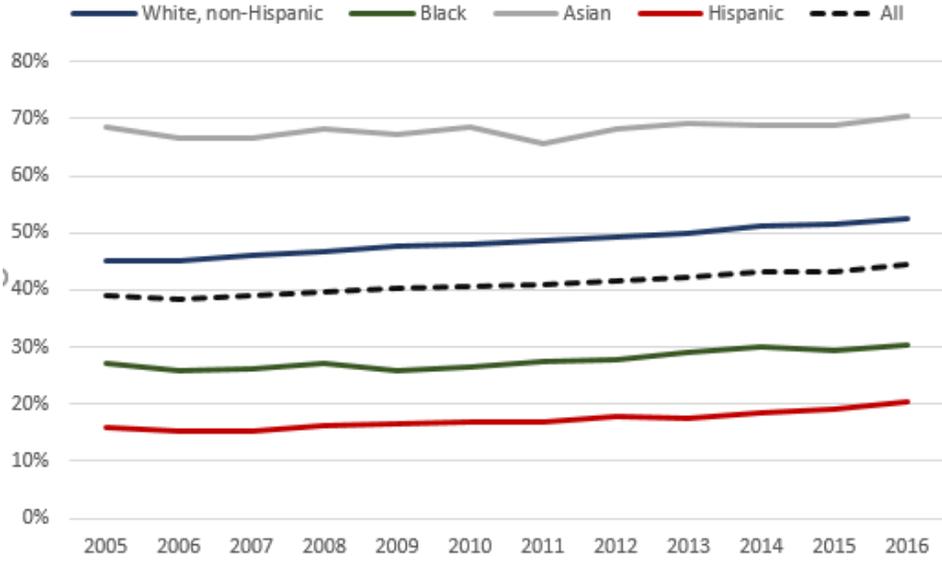

In identifying the set of indicators for ON TO 2050, staff first began by reviewing the existing GO TO 2040 indicators, as revised via the Plan Update process in 2014 and informed by subsequent research. GO TO 2040 provided a strong vision for the region's future, but did not directly address the role economic opportunity plays in long-term regional economic performance. As a result, GO TO 2040 did not include indicators to benchmark the region's progress on inclusive growth.

In alignment with CMAP's strategy to measure regional progress, ON TO 2050 will monitor plan implementation and the region's progress in creating a more inclusive region. ON TO 2050 will include a set of "kindred" indicators related to inclusive growth that measure the region's performance in each of CMAP's core policy areas. These kindred indicators do not

have identified targets but provide additional insights into the regional economy, as well as the region’s progress on implementing inclusive growth strategies.

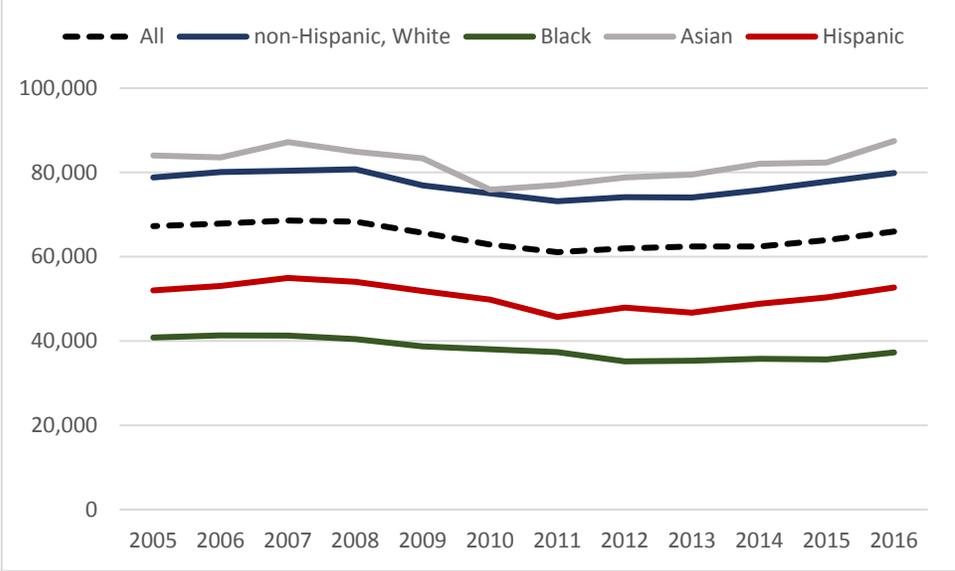

Recommended ON TO 2050 kindred indicators

The following tables summarizes the recommended ON TO 2050 kindred indicators for inclusive growth as relate to the regional economy. Together with existing plan indicators, these indicators offer performance measures to benchmark our progress on implementation of the ON TO 2050 plan.

ON TO 2050 Core Economy Indicator	Workforce participation
Kindred Indicator	Workforce participation <i>by race and ethnicity</i>
Description	<p>These values represent the share of the population in the Chicago metropolitan statistical area age 16 years and over that are either working or actively looking for work by race and ethnicity. Data are from the American Community Survey.</p> <p><i>Workforce participation for population age 16 years and over by race and ethnicity, 2005-2016</i></p> <p>Source: Chicago Metropolitan Agency for Planning analysis of American Community Survey data, 1-year estimates, 2005-2016.</p>

In addition to GO TO 2040 and ON TO 2050 plan indicators, CMAP explores additional trends and data sources through its Regional Economic Indicators microsite and related Policy Updates. These additional indicators provide general signals for the competitiveness and vibrancy of the regional economy, as well as avenues for continued policy analysis. For the ON TO 2050 plan, CMAP staff recommend supplementing the metrics listed above with further kindred indicators based on those used for the Regional Economic Indicators microsite. The tables below summarize the additional recommended kindred indicators.

Next Steps

Following committee review of the above list of proposed kindred indicators, staff will adjust the list as needed to incorporate feedback – by modifying or eliminating indicators, or by adding new ones if necessary. Once the list of ON TO 2050 indicators has been finalized, the indicators will be compiled into a final list of all plan indicators covering the full range of topics in ON TO 2050.
