Policy and Programming Transportation Planning Intern (TPI2019) March 12, 2019

Job Category: Transportation Planning Intern
Experience Required: Current Enrollment in a Graduate Program
Salary Range: \$15.00 per hour

The Chicago Metropolitan Agency for Planning (CMAP) is seeking to hire an intern in the Transportation Planning Division. The Chicago Metropolitan Agency for Planning (CMAP) is our region's comprehensive planning organization. The agency and its partners are now implementing ON TO 2050, a new long-range plan to help the seven counties and 284 communities of northeastern Illinois implement strategies that address transportation, housing, economic development, open space, the environment, and other quality-of-life issues. See www.cmap.illinois.gov for more information.

Position Purpose

The interns will assist in evaluating transportation system investment needs by developing datasets on safety, congestion, transit usage, and calculating performance measures. The ideal candidate for this internship will have strengths in quantitative analysis, geographic information systems (GIS), and basic coding applied to large databases.

Essential Functions:

- Assist with research that enhances the agency's capacity to evaluate the safety, reliability, congestion reduction, economic impact, livability, and other benefits of transportation projects.
- Assist with data collection and processing of highway speed, incident and crash, transit asset, and other large datasets.
- Write issue briefs that explain findings.

Knowledge, Skills, and Abilities:

- Excellent data management skills and the ability to collect, manipulate, and analyze data in spreadsheets and large databases, as well as the ability to generate findings from these data and present results.
- GIS, database, and spreadsheet skills are required. Experience with PostgreSQL, Python, or R is a plus, but not required.
- Demonstrated ability to independently complete research projects and produce reports and issue briefs that are factual, original, compelling, and persuasive.

Education and/or Experience:

- Applicants should be enrolled in a Master's program in Data Science or Analytics, Planning, Engineering, Economics, Computer Science, or a related field.

While the intern will be supervised by CMAP staff, they will be expected to take a high level of responsibility for their own work, and should be self-motivated.
